

On Behalf of The Donor Center, The ARK Current brings to you and your loved ones wishes for a year filled with blessings.

Donor Center Gearing up for Magnificent Upgrade to 4.0

Our excitement is hard to contain because of the many features, improvements, and enhancements that will make the database an even greater tool for our users. The upgrade to 4.0 is scheduled for mid-February. As we approach the launch date, Donor Center will test the software in a testing database to ensure that everything is working well before going live.

We are preparing demos and user trainings to ease the transition. Users can expect a small learning curve with the upgrade, but not on the scale of our initial ARK Go-Live in 2013. Just remember...Positive attitudes prevail! And, in the words of Alanna Thomas, "You cannot break the database". So, get happy and excited for February. ARK is getting better than ever!

Outlook Integration Added to The Development Team Toolbox

Many members of our Development Team now have access to an Outlook Integration tool. Outlook Integration enables ARK to interface with Outlook. This makes it possible for users to manage Interactions from Outlook and to schedule meetings to Outlook from Interactions in ARK. This will eliminate the need to record and edit information in 2 places. We anticipate that this capability will not only simplify, but will help to promote interaction documentation and planning. The availability of this feature is limited to a specific
